STOPPING THE WORLD'S FASTEST.

Moto-Master represent one of the finest lines of replacement and high performance motorcycle brake components available.

Ever since our founding in 1997 we are driven by the desire for innovation. The Ultra-lite, and later-on, our revolutionary Flame rotors are some of the many innovations that have given Moto-Master a solid reputation as a leading aftermarket brake systems manufacturer.

Within a decade after our founding, Moto-Master has managed to secure many National, US and World Championship titles, and we have grown into today's dominating brand in Motocross. The knowledge we gain from developing products for racing at the highest level goes straight into our road brake products. It makes our products more reliable and safer to the benefit of all our customers worldwide.

We offer a wide range of road replacement and road racing discs in Flame and Halo design to best match each rider's individual needs.

All our R&D, engineering, manufacturing, and warehousing are located in the Netherlands. Customer care and rapid availability are key words within our ISO 9001:2015 and TÜV - KBA certified organisation.

We stock one of the widest range of brake rotors on the planet to make sure our distributor network is provided around the clock.

Flame | ADVANTAGE

Next to the premium quality steel alloy which is used to give Moto-Master brake discs unsurpassed friction characteristics and durability, much of the superior performance of a Moto-Master Flame disc lies embedded within its unique design.

All Moto-Master rotors are TÜV/ABE approved.

MAXIMUM CONTROL

Flame shaped venting slots and outer perimeter ensure an equal amount of contact surface between the brake pad and disc throughout the whole rotation of the disc. This results in smooth and more predictable braking action which allows you to brake harder.

REDUCED BRAKE PAD WEAR

The Flame design ensure the brake pads are always evenly supported on the rotor surface. This prevents the pads from tilting under high pressure.

OPTIMAL COOLING & REDUCED WEIGHT

Flame shaped venting slots are lined up in the linear direction of movement which allows oversize slots without them chipping away at the brake pads.

DISC & BRAKE PAD CLEANING

The Flame shaped outer perimeter and venting slots overlap to continuously clean the whole brake pad contact surface while hot gasses are immediately evacuated.

SUPERIOR DISC FINISH

Specialized laser cutting technologies provide a clean cut edge which won't corrode. Disc thickness is parallel within a 0.003mm margin. This eliminates any possible brake lever pulsation while giving unsurpassed rider feedback.

LIGHTWEIGHT FLOATER

The rotor is fitted to the inner carrier using a lightweight design stainless steel floater for maximum strength and durability.

CRAFTSMANSHIP

The inner carrier is precision CNC machined out of billet aircraft aluminium and anodized to provide the strongest and most durable carrier possible.

NRS TECHNOLOGY *

NRS is a unique patented system of a web of steel hooks which are permanently embedded in the friction material. It forms an unbreakable bond between the steel backplate and the friction material. NRS prevents any loss of friction material under extreme thermal conditions which can occur during professional racing and long mountain pass descends.

*NRS is used on our Ceramic and Carbon Racing compounds.

Application

NRS TECHNOLOGY *

NRS is a unique patented system of a web of steel hooks which are permanently embedded in the friction material. It forms an unbreakable bond between the steel backplate and the friction material. NRS prevents any loss of friction material under extreme thermal conditions which can occur during professional racing and long mountain pass descends.

*NRS is used on our Ceramic and Carbon Racing compounds.

Flame Supermoto Racing

320MM RACING DISC

Our Supermoto Racing Disc, designed specifically for use with our Supermoto Racing caliper*, is a 320mm floating rotor in Flame design, utilizing a black anodized aluminium inner carrier. A Supermoto Racing Kit is also available, see page 136.

DESIGN & FUNCTION

- Disc thickness has been increased to 5mm, which allows for no deformation or fading up to 1,004 degrees Fahrenheit (540C).
- *Not compatible with the stock/OEM brake caliper
- TÜV/ABE approved.

Supermoto Racing Caliper Bracket + Adapter

SUPERMOTO ADAPTER

Moto-Master lightweight design, ensure perfect fit and exact caliper position on brake disc while keeping un-sprung weight to a minimum. CNC machined from billet aircraft aluminium, transparent anodized and laser marked. TÜV/ABE approved.

Radial Master Cylinder SUPERMOTO

Our Radial Master Cylinder will maximize the performance of your brake system. While compact in design, this master cylinder uses a forged lever, plate and cylinder to create a strong feel and great durability.

DESIGN & FUNCTION

- The brake lever position is adjustable allowing it to suit any preference, and an optimal leverage ratio built into the design gives you maximum power with just one finger.
- The direct pressure point provides great feedback which ensures optimal control.
- A brake light switch* is also available if needed.
- Black anodized and laser etched aluminium filler cap to complete the package.
- Available in 12mm diameter, these master cylinders are designed for Supermoto Street and Supermoto Racing applications.
- NOTE* Brake light switch sold separately.

Supermoto Racing Caliper 4-PISTON CALIPER

The Supermoto Racing Caliper is built to withstand any thermal and physical stress a caliper will endure when used at top level Supermoto racing. Its rigid design with 4-piston configuration and oversize racing compound brake pads provide all the stopping power you need with a gentle pull of your fingertips.

DESIGN & FUNCTION

- CNC machined out of billet aircraft aluminium.
- Our Racing Caliper is specifically designed for use with our Supermoto Racing Rotor.
- Can be used with your bike's OEM master cylinder and brake line.
- Must be used with our brake pads (part# 099912).
- An even more powerful setup can be achieved by adding our 12mm Radial Master Cylinder and stainless braided brake line to the setup.
- TÜV/ABE approved.

Brake Lines FOR MOTO-MASTER SUPERMOTO MASTER CYLINDER

Developed exclusively for use with our Radial Master Cylinder. Stainless steel braided brake lines are lightweight and durable. They provide a significant increase in feel and response due to reduced flex compared to a standard plastic line.

NOTE! For use with our Supermoto Master cylinder.

Flame Supermoto Street 320MM STREET DISC

Our Supermoto Street Rotor is the ideal solution for the rider that wants race-oriented performance without the cost of switching to a full Supermoto Racing setup. A Supermoto Street Kit is also available, see page 144.

- **NOTE:** This Rotor **MUST** be used with our Supermoto Street Adapter. Supermoto Street Rotors are not compatible with our 4-piston racing Caliper.

DESIGN & FUNCTION

- Designed for use with your stock (OEM) brake caliper.
- Supermoto Street Discs are 4mm thick and utilize a 320mm floating design.
- The Flame outer ring is mounted to a steel inner carrier using 10 lightweight design stainless steel floaters.
- TÜV/ABE approved.
- For optimal performance we recommend using Moto-Master SinterPRO Racing GP brake pads with this brake setup.
- The Supermoto Street setup can be made even more powerful by changing the original (OEM) master cylinder to our Radial Master Cylinder and Steel Braided Brake line.

Supermoto Street Caliper Bracket 320MM DISC

Moto-Master lightweight design, ensure perfect fit and exact caliper position on brake disc while keeping un-sprung weight to a minimum. CNC machined from billet aircraft aluminium, black anodized and laser marked. TÜV/ABE approved.
